

## AIRPORT HANDLING MANUAL (AHM) 30<sup>TH</sup> EDITION

The 30th Edition of the IATA Airport Handling Manual becomes effective on 1 January 2010 and replaces the 29th Edition, which must not be used after 31 December 2009. This Manual contains the latest updates of a series of procedures and specifications, which have been approved by the IATA Airport Services Committee (ASC) as industry standards.

The standards have been developed by specialist groups under the direction and approval of the Airport Services Committee as the most practical and economical standards which airlines, ground handling companies and airports are recommended to follow. These groups are open to all IATA Members, IATA Ground Handling Council (IGHC) Members and IATA Strategic Partners.

During the course of 2009 a group of IATA subject matter experts reviewed the content of the 30th Edition of the IATA Airport Handling Manual to ensure the contents are up-to-date and in line with current processes. We invite all Members to participate in the working groups that develop and regularly review the AHM standards.
