

AIRCRAFT RECOVERY

AREAS OF ACTIVITY

- Collection and dissemination of information related to recovery of damaged and disabled aircraft
- Promote and share efficient and effective aircraft recovery programmes, procedures and practices
- Develop awareness of the economic and operational impact, to airlines and airports, of a disabled aircraft in the airport environment through regular meetings
- Promote strategic co-operations between all parties involved in aircraft recovery
- Develop industry position of the concept of preparedness for aircraft recovery
- Examine and propose procedural changes and design provisions to aircraft manufacturers
- Define the themes, topics and speaker programmes for IATA Aircraft Recovery Conference

COMMITTEES & WORKING GROUPS

AIRCRAFT RECOVERY TASK FORCE (ARTF)

**Contact: Mr. Tom Fodor, Assistant Director
Engineering and Maintenance**

Tel: +1 (514) 874 0202 ext. 3952, Fax: +1 (514) 874 2661

E-mail: fodort@iata.org

www.iata.org/workgroups/artf

This group exchanges information takes appropriate action and plans seminars on the recovery of disabled aircraft. This task is especially important with the increasing size of the airline fleets and the growing congestion at the world's airports. Since every disabled aircraft incident is unique in some aspects, the sharing of experience to improve aircraft recovery techniques is essential.
